

CLAIMS

- [001] A fixing device for an object in a dishwasher consisting of a first section (1) which can be coupled to a crockery basket (3) of the dishwasher and a second section (2) which extends substantially vertically forming a curve, characterised in that the first section (1) is designed as substantially non-rotating and capable of being coupled to a vertical element (3) of the crockery basket.
- [002] The fixing device for an object according to claim 1, characterised in that the second section (2) embodied as a retaining clip is designed so that it can be deformed manually
- [003] The fixing device for an object according to claim 1 or claim 2, characterised in that the first section (1) embodied as a connecting region comprises at least one receiving area suitable for fixing to a vertical basket element (3).
- [004] The fixing device for an object according to claim 3, characterised in that the first section (1) embodied as a connecting region further comprises at least one receiving area suitable for fixing to a horizontal basket element.
- [005] The fixing device for an object according to any one of the preceding claims, characterised in that the second section (2) embodied as a retaining clip (2) is interrupted along its vertical axis in such a manner than a vertical basket element (3) can be guided through this interrupted section.
- [006] The fixing device for an object according to any one of the preceding claims, characterised in that the first section (1) embodied as a connecting region comprises a retaining region (9) whose alignment points away from the vertical basket element (3) in the direction of the second section embodied as a retaining clip.
- [007] A fixing device for an object in a dishwasher consisting of a first section (1) which can be coupled to a crockery basket (3) of the dishwasher and a second section (2) which

extends substantially vertically forming a curve, characterised in that the first section (1) is connected to a cutlery basket.

[008] A fixing device for an object in a dishwasher consisting of a first section (1) which can be coupled to a crockery basket (3) of the dishwasher and a second section (2) which extends substantially vertically forming a curve, characterised in that the first section (1) is non-detachably connected to a region of the crockery basket.
